## ABOUT THE PRODUCER ICON WINES

Icon Wines is a cooperation between ViniMundi and a number of carefully selected local wine producers around the world, with the explicit target to supply the best possible quality at any given price point. Together we aim at producing wines that both reflect the local traditions and terroir, but also the use of modern winemaking.

## VINEYARDS & WINEMAKING

Sicily has a larger wine growing area than the whole country of Germany. A large part of the Mediterranean island is characterized by volcanic soil and warm, dry climate. Among the local grapes grown here are Nero d'Avola and Catarratto.
