

## BEST PRACTICES FOR CONSTRUCTION SITE HEALTH AND SAFETY DURING COVID-19

- **WASH HANDS:** Wash hands often with soap and water for 20+ seconds. Use hand sanitizer when soap and water is unavailable.
- **OTHER HYGIENE:** Avoid touching face; sneeze or cough into a tissue or inside of your elbow; clean frequently touched surfaces.
- **CLEAN:** Keep jobsites clean and organized. Increase the frequency of janitorial services for shared spaces.
- **SOCIAL DISTANCING:** Practice social distancing (6 feet separation) during lunch and other breaks. Do not congregate in job site trailers. Avoid carpooling whenever possible.
- **SICK? STAY HOME!** Anyone not feeling well should immediately notify supervisor and should stay home. Individuals reporting flu-like symptoms while on site should be isolated.
- **TOOLS:** Do not share hand or power tools.
- **PPE:** Do not share personal protective equipment: goggles, gloves, masks, respirators, etc. Sanitize any reusable PPE per manufacturer's recommendation prior to each use.
- **GLOVES:** Use disposable gloves wherever possible. Wash hands after removing gloves.
- **FOOD & DRINK:** Use your own water bottle (no common water coolers). No communal food.
- **PORTAL TOILETS:** Service portable toilets frequently and provide hand sanitizer in or around portable toilets.
- **SCHEDULES:** Adjust schedules to ensure 10 or fewer workers at a time inside each home.
- **INSPECTIONS:** Arrange building inspections so the inspector is the only one present.
- **MUNICIPALITIES:** Work with cities to conduct plan checks electronically or through a drop box outside their offices.
- **CLOTHES:** Change clothes prior to arriving home. Wash clothes in hot water with laundry sanitizer.
