

Aces Companies

ACES Companies helps homeowners make their homes more energy efficient, helps business owners with LED lighting retrofits, and compliments these energy saving solutions with solar installations for both residential and commercial applications. Our goal is to not just offer our customers products but to offer them solutions to lower their operating costs and monthly bills through conserving and creating power. The company was founded in 2016 and we've recently relocated our headquarters from Logan to St. George. We are extremely excited to be here in Southern Utah!
