

Black Diamond Builders

We are a family owned and managed Construction company from Northern Utah for over 25 years. We build production and custom homes. We include our project management team as our reason for being able to produce over 2000 homes from 2000-2005. This includes multimillion-dollar custom homes all the way down to trac homes averaging around 1500 sq. ft. Included in our experience in home building and framing we also paint production and custom homes. We would love to show you how homes are supposed to be built!!! Vendors we got vendors!!!
